Perennial Natives

	<p>Acheille millefolium (Yarrow) Sun to part shade & low to moderate water. Yarrow has beautiful flower clusters and delicate lacy leaves. Grows 2-3 ft tall, spreads through rhizomes, and can create a ground cover. Encourage flowering by cutting back old flowers. Attracts a wide range of pollinators. One Gallon \$9.95</p>		<p>Physocarpus capitatus (Pacific NineBark) Full to part shade with moderate water, this understory shrub is a member of the Rosaceae (Rose) family. The ball-like cluster of flowers with the unique, lobed leaves makes this species the envy of your neighbors and best friend to local insect pollinators. This species has the added benefit of strong root systems for soil stabilization. One Gallon \$9.95</p>
	<p>Eriophyllum staechadifolium (Seaside Woolly Sunflower) Full sun to part shade, & occasional water. This coastal scrub species reaches 2-5 ft high and wide and tolerates salt and wind. Yellow daisy-like flowers bloom in spring and summer. Great use for a groundcover and attracting butterflies, bees, and insect pollinators. One Gallon \$9.95</p>		<p>Stipa pulchra (Purple Needle Grass) Full sun & low moisture. Purple needle grass became California's state grass in 2004, because it is the most widespread native California grass and has helped suppress invasive plant species as well as supporting California's native oaks. This grass tolerates virtually every soil type and can be found in various site conditions. Flower stalks reach 3- 4 ft tall on a bunchgrass 1-2 ft wide. Great groundcover and will readily reseed itself. One Gallon \$9.95</p>
	<p>Epilobium canum (California Fuchsia) Sun to part shade & low water. This scarlet flowered perennial is great for rock gardens and any dry areas that need an extra pop of color. This is a plant that hummingbirds will often be seen fighting over. Spreads by rhizomes and can be used as a ground cover. After fall dormancy, cut to the ground to make room for spring growth. One Gallon \$9.95</p>		<p>Iris douglasiana (Douglas Iris) Sun to partial shade & occasional to moderate water. Found in sunny coastal prairies to the redwood forest. Has strikingly large flowers that range from blue-ish purple to buttery yellow and attracts a wide range of pollinators. Will form spreading clumps of dark green leaf blades. Prefers heavy soil with organic matter. One Gallon \$11.95</p>
	<p>Ranunculus californicus (California Buttercup) Full sun to part shade & moderate moisture. This perennial has deep yellow flowers that bloom during winter and spring and can reach to 1 ft tall. By summer, flowers have shed and the plant will become dormant. Great for gardens to attract bees. Little if any summer irrigation needed. Will readily reseed itself in late winter to spring. One Gallon \$9.95</p>		<p>Aesculus californica (California Buckeye) Part shade to full sun & low water. This deciduous tree has a beautiful dark green foliage and white upright flower clusters that attract moths and butterflies. Growing from 13-40ft tall and wide they are great for hedges and are deer resistant. Tree Pot \$11.95</p>
